

InspoSearch — Mega Source Expansion Prompt

Session: Image Source Integration for InspoSearch | Goal: 1000 sources, 10B+ images

```
## YOU ARE: SOURCE-ADDER (Image Source Integration for InspoSearch)
Read INSPOSEARCH_MASTERPLAN.md, CURRENT_STATE.md,
and InspoSearch-Expansion-V2.md before doing anything.
```

```
MISSION: Large-scale source expansion.
Target: 1000 sources, 10B+ images.
Use Node.js for ALL API testing.
```

```
Rules:
```

- Test each source with 3 terms: portrait, landscape, flower
- Only activate if 3/3 terms return images
- Create /sources/xxx.json for every new manifest source
- For hardcoded adapters: write fetchXxx() in index.html
- Commit after every phase
- Report: added count, rejected count, total active

PHASE A — Aggregator Sub-Collections (highest priority)

These use existing integrations already in the app. Add sub-collection variants by filtering existing APIs. Each sub-collection becomes a named source in the UI. This alone should add 100-200 sources with minimal code.

A1 — Europeana Sub-Collections

Europeana has 3,000+ contributing institutions. Add these as individual sources by filtering DATA_PROVIDER or PROVIDER. Each gets its own entry in ALL_SOURCES and SOURCE_META. Use existing fetchEuropeana() but add a provider filter param.

Add these 20 Europeana sub-collections as individual sources:

- Rijksmuseum via Europeana | &qf;=DATA_PROVIDER:Rijksmuseum
- Europeana Fashion | &qf;=PROVIDER:Europeana+Fashion
- Deutsche Digitale Bibliothek | &qf;=DATA_PROVIDER:Deutsche+Digitale+Bibliothek
- Bibliothèque nationale de France | &qf;=DATA_PROVIDER:Biblioth%C3%A8que+nationale+de+France
- National Library of Spain | &qf;=DATA_PROVIDER:Biblioteca+Nacional+de+Espa%C3%B1a
- National Library of Netherlands | &qf;=DATA_PROVIDER:Koninklijke+Bibliotheek
- National Library of Poland | &qf;=DATA_PROVIDER:Biblioteka+Narodowa
- National Library of Czech Republic | &qf;=DATA_PROVIDER:Národní+knihovna+■R
- Europeana Photography | &qf;=PROVIDER:Europeana+Photography
- Europeana Sounds | &qf;=PROVIDER:Europeana+Sounds&qf;=TYPE:IMAGE
- Europeana Newspapers | &qf;=PROVIDER:Europeana+Newspapers
- Kulturpool Austria | &qf;=DATA_PROVIDER:Kulturpool
- Hispana Spain | &qf;=DATA_PROVIDER:Hispana
- Digital Library of Slovenia | &qf;=DATA_PROVIDER:Digital+Library+of+Slovenia
- Estonian National Museum | &qf;=DATA_PROVIDER:Estonian+National+Museum
- Lithuanian Archives | &qf;=DATA_PROVIDER:Lithuanian+Central+State+Archives
- Latvian National Library | &qf;=DATA_PROVIDER:National+Library+of+Latvia
- Hungarian National Library | &qf;=DATA_PROVIDER:Országos+Széchenyi+Könyvtár
- Romanian National Library | &qf;=DATA_PROVIDER:Romanian+National+Library
- Bulgarian National Library | &qf;=DATA_PROVIDER:Bulgarian+National+Library

A2 — DPLA Hub Sub-Collections

DPLA aggregates 2,000+ US institutions. Add these US state/regional hubs as individual sources using the existing DPLA integration with provider filter.

- California Digital Library | &provider;=California+Digital+Library
- Digital Commonwealth (Massachusetts) | &provider;=Digital+Commonwealth
- Empire State Digital Network (New York) | &provider;=Empire+State+Digital+Network
- Mountain West Digital Library | &provider;=Mountain+West+Digital+Library
- Minnesota Digital Library | &provider;=Minnesota+Digital+Library
- Michigan Digital Library | &provider;=Michigan+Digital+Library
- Illinois Digital Heritage Hub | &provider;=Illinois+Digital+Heritage+Hub
- Kentucky Digital Library | &provider;=Kentucky+Digital+Library
- South Carolina Digital Library | &provider;=South+Carolina+Digital+Library
- Georgia HomePLACE | &provider;=Georgia+HomePLACE
- Texas Digital Library | &provider;=Texas+Digital+Library
- Pacific Northwest Digital Collections | &provider;=Pacific+Northwest+Digital+Collections
- Ohio Digital Network | &provider;=Ohio+Network+of+American+History+Research+Centers
- Pennsylvania Digital Collections | &provider;=PA+Digital
- New England Digital Collections | &provider;=New+England+Digital+Collections

A3 — Smithsonian Sub-Museums

Already have main Smithsonian. Add these 15 individual museums as named sources:

- National Museum of American History | unit_code=NMAH
- National Museum of Natural History | unit_code=NMNH
- National Portrait Gallery | unit_code=NPG
- American Art Museum | unit_code=SAAM
- Hirshhorn Museum | unit_code=HMSG
- National Zoo | unit_code=NZP
- Cooper Hewitt Design | unit_code=CHNDM
- Freer|Sackler Asian Art | unit_code=FSG
- African Art Museum | unit_code=NMAFA
- American Indian Museum | unit_code=NMAI
- African American History | unit_code=NMAAHC
- Air and Space Museum | unit_code=NASM
- Postal Museum | unit_code=NPM
- Anacostia Community Museum | unit_code=ACM
- Renwick Gallery | unit_code=SAAM

A4 — Wikimedia Category Filters

Add these Wikimedia Commons category filters as individual named sources:

- Wikimedia Fashion | gcmtitle=Category:Fashion
- Wikimedia Architecture | gcmtitle=Category:Architecture
- Wikimedia Paintings | gcmtitle=Category:Paintings
- Wikimedia Sculptures | gcmtitle=Category:Sculptures
- Wikimedia Maps | gcmtitle=Category:Historical_maps
- Wikimedia Natural History | gcmtitle=Category:Natural_history
- Wikimedia Portraits | gcmtitle=Category:Portraits
- Wikimedia Botanical Illustrations | gcmtitle=Category:Botanical_illustrations
- Wikimedia Scientific Diagrams | gcmtitle=Category:Scientific_diagrams
- Wikimedia Street Photography | gcmtitle=Category:Street_photography

```
git commit -m "source-adder: aggregator sub-collections batch A"
```

PHASE B — Zero-Auth Free APIs (add directly)

These APIs require no key and no auth. Test each via Node.js and add confirmed ones as hardcoded fetchXxx() functions in index.html.

James Webb Space Telescope | Category: Space | Function: fetchJWST()

```
https://api.jwst.nasa.gov/api/v0.1/images?limit=3
```

```

```
git commit -m "source-adder: zero-auth free APIs batch B"
```

PHASE C — IIIF Universe (400+ institutions)

The `fetchIIIFSearch()` adapter is already built. Test these institutions and add confirmed ones to the manifest with adapter: `'iiif_content_search'`. Each needs a IIIF Content Search endpoint — find it by:

1. Checking iiif.io/guides/finding_iiif_resources/
2. Looking for `/iiif/search` or `/search?format=iiif` on their domain
3. Checking their IIIF manifest for a `@service` block with search profile

C1 — National Libraries (IIIF)

British Library

```

Gallica Press BnF

Already in app – filter for newspapers specifically

```
git commit -m "source-adder: niche + specialized sources batch D"
```

PHASE E — Final Cleanup

```
STEP E1 – Update _totalSources in sources.manifest.json
```

```
STEP E2 – Update CURRENT_STATE.md:
```

- All sources added with function names
- All sources tested and rejected with reasons
- New total active source count
- Breakdown by category

```
STEP E3 – Final commit and push:
```

```
git add .
```

```
git commit -m "source-adder: mega expansion complete – [X] sources added"
```

```
git push
```

After every phase report:

- Sources added (name + method: manifest or hardcoded)
- Sources rejected (name + exact reason)
- Current total active sources
- Estimated total images accessible
- Any blockers for next phase
